

A warm welcome TO MAINAU ISLAND

Whether it be spring, summer, autumn or winter, the flower island is an experience in any season and warmly invites you to enjoy the park and the gardens while in the open fresh air. It offers 45 hectares of fascinating insights and views and will surprise you again and again with its abundance of blossoms.

Our father, Count Bernadotte, son of Prince William of Sweden and of the Grand Duchess Maria Pavlovna, developed the former castle park of his great-grandfather Frederick I of Baden into a paradise of flowers and plants and opened it to the public.

For many decades now, Mainau Island has been creating Flower Power. Every single plant is placed centre stage under this motto in 2024 and its extraordinary power is highlighted at the same time. In addition, beautiful arrangements of flowers complete the palette of colours of 1960s and 70s.

You are warmly welcome at Mainau Island in these eventful times, to pause and enjoy some relaxation. We are looking forward to your visit!
